

Quality Products Since 1968

Manufactured by:

Helm Welding (1983) Limited

Digi-Star Livestock Weighing Systems

A basic stock weighing system would include a set of load cells, a platform and a basic read up / read down scale indicator.

These systems are perfect for all applications of weighing cattle, pigs, sheep, goats and more.

Ideal for 4H clubs and other livestock organizations.

Other indicators are available that allow programmable data, data download to computer and EID wand reader integration. Hand held, portable indicators are available as well.

For full information on the available systems visit www.digi-star.com
For pricing and details contact Helm Welding directly.
